Mobile Internet

Thorsten Lohmar

Ericsson Research, Aachen, Germany

The presentation covers three main aspects of the Internet Car concept. The first part of the presentation motivates communication in vehicles and describes basic needs to support communications in vehicles. The middle part is devoted to our movie "Faster Than you Think", which draws a visionary picture on the usage of communication in vehicles. The main topic of the last part of the presentation is the demonstration covering the basic approach of the Communication Platform as well as vehicular based services.
